

FIGURE e4.5.13 The complete finite-state machine control for the datapath shown in Figure e4.5.4. The labels on the arcs are conditions that are tested to determine which state is the next state; when the next state is unconditional, no label is given. The labels inside the nodes indicate the output signals asserted during that state; we always specify the setting of a multiplexor control signal if the correct operation requires it. Hence, in some states a multiplexor control will be set to 0.
